

90WH V-MOUNT BATTERY

The SM-4060 14.8V Gold Mount Li-Ion Battery (90Wh, 6.2Ah) is a compact battery pack for applications requiring lighter setups. The battery is capable of discharging up to 55Watts continuously without overheating or suffering performance loss.

A P-Tap power output port is available on the side for devices operating at 14.8V nominal voltage. It will provide up to 5A of power and are electronically and independently protected against shorts and overload so not to compromise the battery's main supply. A 4 segment LED gauge on the side confirms remaining capacity at the press of a push button. There's no memory effect and the battery can be charged at any time. You can use any B4B charger designed for V-Mount Li-Ion batteries, such as the SM-C2 2 channel simultaneous charger. Or our TC-1 universal travel charger through the specialized side polarized DC connector. As well as Sony or IDX V-Mount chargers. This model has no IATA restrictions and can be transported in reasonable quantities in hand luggage, or in checked-in luggage if installed in your equipment. Always check latest regulations and with your Airline before travel if unsure of current restrictions.

Voltage : 14.4 V

Full voltage : 16.8+/-0.1 V

Cutoff voltage : 11 V

Capacity : 90 Wh

Power limit : 55 W

Dimensions excluding mount : 6" x 4" x 1.5 in

Weight: 2 lbs.

Mount type : V-Mount (Sony - IDX Style Mount)
